

## DTV Transition

By law, full-power television stations nationwide must switch to all-digital broadcasting by February 17, 2009. If all of your TV sets are connected to cable, satellite or other pay television service, you should not be affected and will continue to receive programming after the transition. But if you use an antenna to watch TV on any sets with built-in analog (NTSC) tuners that are not connected to a pay TV service, those sets will need to be upgraded to continue receiving television signals after the switch.
